

CSCI 507: Data Structures

Lab Assignment 1: Warm-up with Java

This lab assignment is just a warm-up for development practice with Java.

1. Write a simple "HelloWorld" class that prints "Hello World!" on the screen.

2. In the `main()` method, get a `String` value from user and set a local variable `name` using `Scanner` object. Then print "Hello X" where X is the value entered by the user.

Example:

```
String str;  
Scanner in = new Scanner (System.in);  
System.out.print ("Enter your name: ");  
str = in.nextLine ();
```
